

Solution-IV RTS

Accounting and Business Management

Solution-IV® RTS is a completely integrated business management solution for the Team Sports industry. The General Accounting modules are GAAP compliant and satisfy the demands of corporate management and the finance department. The Operations modules manage Order Processing, POS, Job Tracking, and Inventory requirements. A full range of specialized Team Sports pricing and customer discount options are supported. Our optional Web-based Customer Service module enables customers to view their account status, invoices, existing orders, get quotes, place orders and order Service Calls. Solution-IV supports plain paper, fax and e-mail of Statements, Invoices, Orders, Purchase Orders and Quotes. e-Dash™ gives you a complete review of your business metrics NOW!

Thoroughbred Software has been in business for over 30 years and supports a world-wide customer base of over 300,000 users of its products.

Your Choice of Platform

With the wide variety of hardware and operating system platforms available today, one must look at the complete picture before making a purchasing decision. From the accounting software perspective, however, the choice is easy. **Solution-IV RTS** runs on Windows, UNIX, Linux and Apple OSX Operating Systems. You can confidently make your application decision without regard for hardware or software platform configurations. **Cloud-based** systems are also available.

Integration With Windows-Based Productivity Tools

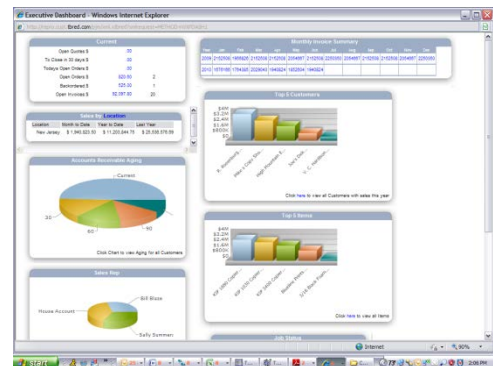

Solution-IV RTS Accounting can integrate your business data with Windows Productivity products such as spreadsheets, word processors and databases. You can create and display graphs and charts and insert data into documents using your favorite Windows-based software with our TS ODBC DataServer™ option.

POS – Retail functions including selling, crediting, team pricing, discounting, Gift Cards and Credit Cards.

Special Team Sports Features – Multi-Dimensional Arrays, Instant PO, Player Packs and Web Store interfaces.

Print to EXCEL – Allows tables to be printed to EXCEL on demand.

e-Dash Analytics – A dashboard display of all the key data in the system, available with a few mouse clicks through a browser interface.

Solution-IV RTS

Accounting and Business Management Modules

General Ledger	Your transactions are brought together to give you a detailed picture of your financial condition. Up to 24 months may be open, and there is an actual to budget feature. General Ledger supports multi companies, warehouses and divisions.
Accounts Payable	Purchases and payments are organized into reports that illustrate where your money is going, who needs to be paid, and how much cash you need to make timely payments and to take advantage of discounts.
Accounts Receivable	Your sales, profit information and cash receipts are organized into reports that show items selling, profitability, outstanding receipts, sales representative's productivity and Customer Information.
Order Processing POS	Fully integrates your invoicing, inventory, accounts receivable and sales analysis functions. It helps you track your open orders, generate job tickets, produce invoices, handle RMAs and process quotes. POS supports Bar Code Scanners, Credit Cards, and more.
Special Order Processing Pricing/Discount Options	Order Processing supports many customer/item pricing options including the following: multi-dimension color/size entry, Stock/Non-Stock, Instant PO, list price discount, mark up cost or percentage, discount percentage, and actual price. Pricing can be established by customer by item up to 10 levels including contract and project pricing.
Inventory Control	Manage your inventory. Inventory Control helps you trace your inventory transactions and turnover. Inventory Control Supports Multi- warehouses and warehouse transfers.
Purchase Orders	Automatically creates and prints purchase orders and records item receipts with full integration to Inventory Control. Orders may be tracked by item or vendor. Purchase analysis reports are also provided. Instant PO generation.
Payroll	Calculates employee checks and provides the reports for federal and state agencies. Payroll handles multiple taxing jurisdictions as well as 401(k) plans. Payroll can be integrated into TimExpress.
Fixed Assets	Helps you manage your assets and calculate depreciation. You may have different depreciation calculations on an asset as required for your business and taxing jurisdictions.
WebServices	A customer-oriented, Web-based interface allows your customers to access their account information, review and print past invoices and statements, get quotes, place orders, track orders, and set-up Service Requests.
Prospect Management	Assists the sales staff in managing their prospect and customer database. It is integrated with Accounts Receivable, giving the sales representative the option to convert a prospect into a customer.
FormsCreator	e-Mail, Fax and print on plain paper invoices, statements, orders and purchase orders. FormsCreator can pay for itself in a few months by reducing personnel and postage costs.
Credit Card Processing	An integrated Credit Card Processing option enables a seamless verification operation when taking Credit Cards for payment. Internet based, credit cards are swiped and verified in seconds.
UPS /FedEx Shipping	Shipment information can be downloaded to the UPS WorldShip system eliminating multiple entry.
e-Dash Analytics	Solution-IV Analytics provides a simple to use graphic interface that with single clicks allow you to view your customers, accounts, sales and product detail, top-10 customers and items, and more.
Sports Inc. Billing	Sports Inc. AP Processing.
OrderMyGear interface	Automatically generates Solution-IV orders from the OrderMyGear website.
Support and Maintenance Programs	Solution-IV is backed by a comprehensive Service and Maintenance program. This program provides Product Support, Product Maintenance updates and feature enhancements to keep your Solution-IV system running in top shape. Training and Data Conversion Services available.
